SUPERVISOR ITEMS

The Supervisor reported that the Town received the April Sales Tax Distribution Report from Saratoga County. The Sales Tax for the County was \$13,318,667.00, a decrease of over 6% from April of 2022. The Town of Moreau's April Sales Tax Report was \$314,590.00 compared to last year's report of \$358,735.00. Supervisor Kusnierz attributed this decrease to the shrinking economy.

The Supervisor shared a public invitation regarding the Annual Saratoga County Senior Luncheon that will be held on May 19, 2023, at the Saratoga Springs City Center from 11:00 am-3:00 pm.

The Supervisor shared that he and Councilmember VanTassel had the pleasure of attending the South Glens Falls Fire Company, Inc.'s annual banquet on Saturday April 22nd. He thanked them for the invitation, also stating that it was great to see the event so successful.

The Supervisor stated that he had received a letter from National Grid, dated 4/20/2023, regarding Town owned property on 39-41 Sisson Road. National Grid is looking to obtain an easement from the Town. The purpose of this easement would be for the Town to grant permission to place a new pole at the proposed location. Supervisor Kusnierz asked Counsel whether or not she had heard back from them yet, her reply was that she had not.

EXECUTIVE SESSION

The Supervisor stated that there was no need for an executive session at this time.

OTHER BUSINESS

Councilmember Donohue stated that the South Glens Falls / Moreau Chamber of Commerce had asked him if the Town could become a sponsor for summer concerts that are going to be held at the park. Councilmember Donohue stated that each sponsorship costs \$500.00. Supervisor Kusnierz asked for more details, stating that the Board has a fiduciary responsibility to the taxpayers when spending their money. Councilmember VanTassel and Councilmember Stewart both agreed that that once the Board gets more information, they will collaborate with the Supervisor's Office for funding options.

PRIVILEGE OF THE FLOOR

Brigid Martin, Town Historian, was first to address the Board. She wanted to discuss further what Councilmember Donohue had just spoken about. She noted that the Chamber of Commerce's website only mentions South Glens Falls, and that any money spent by the Town of Moreau should be for the Town. She stated that the money that is in the Town's 2023 budget for Recreation should only be for Town programs, and not syphoned over to the Village. She also stated that it would be nice to have the Town host their own concerts and public events out at the Recreation Center. She stated that when she met with the Glens Falls Collaborative, they told her that Tuesday nights would be a suitable time to hold public events. She then questioned Councilmember Donohue wondering what programs he has brought to the Town of Moreau,

John Jackowski, 34 Grey Fox Drive, spoke next regarding the high-water table. He started by referencing Blue Neil's report. He said that there were issues in the report, specifically an abandoned channel that runs on the inside of 32 and 197. He stated that the water table has come up around 6ft since 2018, prior to that it was down by 14ft. He stated that there is more that needs to be done in order to keep the water levels down. He stated that it is a complicated system, and that the report was vague about what has caused the water level problem. Councilmember Stewart asked that a copy of the referenced report be available for him to look over.

A Regular Meeting of the Town Board of the Town of Moreau was held on April 25, 2023, in the Town of Moreau Municipal Building, 351 Reynolds Road, Moreau, New York.

Michelle Johnson, 451 Gansevoort Rd, was the last to address the Board. She spoke about the amount of water that has flooded her property. She stated that she has spoken to Councilmember Noonan, Councilmember Donohue, Matt Dreimiller, and Blue Neils, regarding this ongoing problem. She stated that about 40 % of her property has become saturated ever since Shawn McKenna built his homes. She questioned where this water was going prior to when these forementioned homes were built. She stated that she can no longer go outside and enjoy her property anymore. She stated that she has complained about this issue for 4 years now; has sent pictures and notices to the Town referencing all of her concerns. She stated that her property is washing away, and that she is pumping 24/7. She stated that when she spoke with Matt Dreimiller he had told her that he has to sign off on a SWPPP (Storm Water Prevention Protection Plan), and that she is unsure if that has been done yet. She stated that she does not have \$2,000-\$3,000 to pay an engineer to look at her property. Councilmember Noonan stated that he has been there and has seen all of the water and was hopeful of being part of a solution 4 years ago.

No other member of the public wished to be heard.

Full Environmental Assessment Form
Part 2 - Identification of Potential Project Impacts

Agency Use Only [If applicable]
 Project : Big Bend Trail
 Date : May 3, 2023

Part 2 is to be completed by the lead agency. Part 2 is designed to help the lead agency inventory all potential resources that could be affected by a proposed project or action. We recognize that the lead agency's reviewer(s) will not necessarily be environmental professionals. So, the questions are designed to walk a reviewer through the assessment process by providing a series of questions that can be answered using the information found in Part 1. To further assist the lead agency in completing Part 2, the form identifies the most relevant questions in Part 1 that will provide the information needed to answer the Part 2 question. When Part 2 is completed, the lead agency will have identified the relevant environmental areas that may be impacted by the proposed activity.

If the lead agency is a state agency **and** the action is in any Coastal Area, complete the Coastal Assessment Form before proceeding with this assessment.

Tips for completing Part 2:

- Review all of the information provided in Part 1.
- Review any application, maps, supporting materials and the Full EAF Workbook.
- Answer each of the 18 questions in Part 2.
- If you answer “Yes” to a numbered question, please complete all the questions that follow in that section.
- If you answer “No” to a numbered question, move on to the next numbered question.
- Check appropriate column to indicate the anticipated size of the impact.
- Proposed projects that would exceed a numeric threshold contained in a question should result in the reviewing agency checking the box “Moderate to large impact may occur.”
- The reviewer is not expected to be an expert in environmental analysis.
- If you are not sure or undecided about the size of an impact, it may help to review the sub-questions for the general question and consult the workbook.
- When answering a question consider all components of the proposed activity, that is, the “whole action”.
- Consider the possibility for long-term and cumulative impacts as well as direct impacts.
- Answer the question in a reasonable manner considering the scale and context of the project.

Full Environmental Assessment Form
Part 3 - Evaluation of the Magnitude and Importance of Project Impacts
and
Determination of Significance

Part 3 provides the reasons in support of the determination of significance. The lead agency must complete Part 3 for every question in Part 2 where the impact has been identified as potentially moderate to large or where there is a need to explain why a particular element of the proposed action will not, or may, result in a significant adverse environmental impact.

Based on the analysis in Part 3, the lead agency must decide whether to require an environmental impact statement to further assess the proposed action or whether available information is sufficient for the lead agency to conclude that the proposed action will not have a significant adverse environmental impact. By completing the certification on the next page, the lead agency can complete its determination of significance.

Reasons Supporting This Determination:

To complete this section:

- Identify the impact based on the Part 2 responses and describe its magnitude. Magnitude considers factors such as severity, size or extent of an impact.
- Assess the importance of the impact. Importance relates to the geographic scope, duration, probability of the impact occurring, number of people affected by the impact and any additional environmental consequences if the impact were to occur.
- The assessment should take into consideration any design element or project changes.
- Repeat this process for each Part 2 question where the impact has been identified as potentially moderate to large or where there is a need to explain why a particular element of the proposed action will not, or may, result in a significant adverse environmental impact.
- Provide the reason(s) why the impact may, or will not, result in a significant adverse environmental impact
- For Conditional Negative Declarations identify the specific condition(s) imposed that will modify the proposed action so that no significant adverse environmental impacts will result.
- Attach additional sheets, as needed.

For all instances where no impact or minor impact was checked on Part 2 of the EAF, no significant adverse environmental impacts are anticipated.

Determination of Significance - Type 1 and Unlisted Actions

SEQR Status: Type 1 Unlisted

Identify portions of EAF completed for this Project: Part 1 Part 2 Part 3

Upon review of the information recorded on this EAF, as noted, plus this additional support information

and considering both the magnitude and importance of each identified potential impact, it is the conclusion of the
Town of Moreau _____ as lead agency that:

A. This project will result in no significant adverse impacts on the environment, and, therefore, an environmental impact statement need not be prepared. Accordingly, this negative declaration is issued.

B. Although this project could have a significant adverse impact on the environment, that impact will be avoided or substantially mitigated because of the following conditions which will be required by the lead agency:

There will, therefore, be no significant adverse impacts from the project as conditioned, and, therefore, this conditioned negative declaration is issued. A conditioned negative declaration may be used only for UNLISTED actions (see 6 NYCRR 617.7(d)).

C. This Project may result in one or more significant adverse impacts on the environment, and an environmental impact statement must be prepared to further assess the impact(s) and possible mitigation and to explore alternatives to avoid or reduce those impacts. Accordingly, this positive declaration is issued.

The body of each wage determination lists the classification and wage rates that have been found to be prevailing for the cited type(s) of construction in the area covered by the wage determination. The classifications are listed in alphabetical order of ""identifiers"" that indicate whether the particular rate is a union rate (current union negotiated rate for local), a survey rate (weighted average rate) or a union average rate (weighted union average rate).

Union Rate Identifiers

A four letter classification abbreviation identifier enclosed in dotted lines beginning with characters other than ""SU"" or ""UAVG"" denotes that the union classification and rate were prevailing for that classification in the survey. Example: PLUM0198-005 07/01/2014. PLUM is an abbreviation identifier of the union which prevailed in the survey for this classification, which in this example would be Plumbers. 0198 indicates the local union number or district council number where applicable, i.e., Plumbers Local 0198. The next number, 005 in the example, is an internal number used in processing the wage determination. 07/01/2014 is the effective date of the most current negotiated rate, which in this example is July 1, 2014.

Union prevailing wage rates are updated to reflect all rate changes in the collective bargaining agreement (CBA) governing this classification and rate.

Survey Rate Identifiers

Classifications listed under the ""SU"" identifier indicate that no one rate prevailed for this classification in the survey and the published rate is derived by computing a weighted average rate based on all the rates reported in the survey for that classification. As this weighted average rate includes all rates reported in the survey, it may include both union and non-union rates. Example: SULA2012-007 5/13/2014. SU indicates the rates are survey rates based on a weighted average calculation of rates and are not majority rates. LA indicates the State of Louisiana. 2012 is the year of survey on which these classifications and rates are based. The next number, 007 in the example, is an internal number used in producing the wage determination. 5/13/2014 indicates the survey completion date for the classifications and rates under that identifier.
